Projects

Content Farm

In production

A system that suggests ideas, produces carousels, posts and stories from real photos, checks that every text matches what the photo shows and places the pieces in a web panel where the team decides. Nothing is published without approval.

Python · Supabase (PostgreSQL) · JavaScript · Remotion / React · Playwright · ffmpeg

POS system

In production

Point-of-sale web app in daily use: tablet checkout, thermal printer integration, returns management and automatic Excel export as a backup.

JavaScript · HTML · CSS · PWA · IndexedDB · WebUSB (ESC/POS)

Personal library

Final project · DAM1

MVC web app to register books and readings with ratings and reviews, organise them by categories and tags, and view reading stats: pages read, average rating and books per category.

Java 21 · Spring Boot · JPA / Hibernate · MySQL · Thymeleaf · Maven

Library

In development · DAM2

Native Kotlin app that consumes its own REST API built with Spring Boot and PostgreSQL, keeping business logic centralised on the server.

Kotlin · Android · API REST

About

I'm a software developer, focusing on backend with Java and Spring Boot and on Android development with Kotlin.

Before programming I worked in retail, customer service and tourism. That varied background gave me responsibility, adaptability and the habit of working in a team under pressure.

Backend

Java
Kotlin
Python
Spring Boot
JPA / Hibernate
PostgreSQL
MySQL
Supabase

Frontend

JavaScript
TypeScript
HTML
CSS
Astro
Thymeleaf

Tools

Git / GitHub
GitHub Actions
Maven
Google Workspace

Languages

Spanish	Native
Catalan	Native
English	B2
Italian	B2

Education

Higher Vocational Diploma in Multiplatform Application Development (DAM)
La Salle · Sept 2025 – present
